

## **CONTINENTALDIVIDE**

AN ENERGY & TELECOMMUNICATIONS COOPERATIVE

Continental Divide has contracted with **Davey Resource Group** (DRG) to inventory electrical poles and pole attachments and digitally map this equipment within our service territory.

The information they gather will help Continental Divide more accurately identify the equipment in the event of outages and emergencies.

Throughout the month of **May**, DRG crews will perform work throughout the city of **Grants**. They will work Monday through Saturday between dawn and dusk and will carry co-op issued ID badges with a name and picture, along with a “Letter of Authority” giving DRG employees access to its power lines and equipment.

DRG employees travel in white pickup trucks and all-terrain vehicles marked with the DRG logo. Trucks also display exterior signs that say they are a utility contractor with Continental Divide. If DRG technicians need access your property, they will attempt to make contact with area residents or leave door hangers.

For more information or questions on the inventory project, co-op members can contact our Grants office at (505) 285-6656 and ask to speak to someone in the engineering or member services departments.
