

Construction is Underway to Enable Laguna to Build Its Internet

This month, CDEC contractors begin make-ready construction in the **Laguna** area to enable the Pueblo to build its own internet service. Contractors will upgrade existing electrical facilities, including the replacement and installation of additional poles. Most of the work will not disrupt power. However, when equipment such as transformers needs to be removed and placed onto another pole, contractors will have to briefly disrupt power. When that happens, CDEC will ensure area residents are notified. Contractors will work as diligently as safety allows to minimize disruptions. Thank you, in advance, for your patience and understanding. For more information, contact CDEC's Engineering Services department in Grants at (505) 285-6656.

Make-Ready Construction Started for Red Bolt Broadband

This month, CDEC contractors begin make-ready construction in the **San Fidel** and **Cubero** areas to accommodate Red Bolt Broadband internet equipment. Contractors will upgrade existing electrical facilities, including the replacement and installation of additional poles. Most of the work will not disrupt power. However, when equipment such as transformers needs to be removed and placed onto another pole, contractors will have to briefly disrupt power. When that happens, CDEC will ensure area residents are notified. Contractors will work as diligently as safety allows to minimize disruptions. Thank you, in advance, for your patience and understanding. For more information, contact CDEC's Engineering Services department in Grants at (505) 285-6656.
